PROJECTS

E-Commerce Website :- GitHub | Live Demo — HTML, CSS & JavaScript

- Built a responsive product grid system with client-side signup/login and form validation. Managed sessions with Session Storage and blocked direct URL access for unauthenticated users.

Below projects are built while following "Microsoft's Web Development for Beginners" curriculum

Carbon Trigger Browser Extension (in progress) :- GitHub — Node.js, JavaScript, Webpack, npm, REST API

- Building an extension that shows regional electricity carbon intensity via the CO2 Signal API. Learning Webpack builds, API key handling, and loading unpacked extensions in Edge.

Typing Game :- GitHub | Live Demo — HTML5, CSS3, JavaScript (ES6+)

- A typing game with live WPM and accuracy tracking across three difficulty levels. Added streak-based level progression, error highlighting, and screen-reader status updates.

My Terrarium :- GitHub | Live Demo — HTML, CSS, JavaScript

- Created an interactive drag-and-drop terrarium with z-index layering and a reset button. Persisted plant layouts with Local Storage in a responsive, animated UI.

EXPERIENCE

Growth Marketing Intern, PHICSIT Pvt Ltd — May 2026 – July 2026

- Launched a daily DSA content series on LinkedIn and X, maintaining consistent delivery and adjusting the format based on reach. Tracked analytics on both to improve content growth.
